

# US LEGISLATION INSPIRES CERTAINTY IN NORTH AMERICA

## 1.- CHIPS Act:

the United States will allocate more than \$52 billion for semiconductor research and manufacturing.

## 2.- IRA:

U.S. consumers could have access to a stimulus of up to \$7,500 to purchase **electric vehicles produced in North America**, thus increasing the attractiveness of making and assembling cars in Mexico.

This law is particularly relevant in nearshoring: it is the first to explicitly recognize Mexico's importance in U.S. industrial policy.
