MEZCAL

AGROINDUSTRY

EXPORT

Oaxaca has a privileged biodiversity of vegetation and climates, that give us a great variety of agricultural, livestock and agro industrial products. As well we are suppliers of raw materials for designing and producing handcrafts and textiles, among others.

On the other hand, the conventional and organic production system, and the transformation of our products in the traditional way, make them highly valued goods.

The products are demanded not only in our entity but also at the national and international market.

It fits with the trend of current consumption that seeks to return to the origin.

OFFER

Mezcal
